## Konformitätserklärung

Hiermit bestätigen wir auf der Grundlage der uns vorliegenden Erklärungen unserer Vorlieferanten die Konformität der **Kaffeetassen mit Henkel** wie folgt:

„We confirm in sole responsibility that for the production of our articles produced from PS HI white following statements comply.

### 1. Regulatory requirements

The above described articles meet the relevant requirements of the regulation 10/2011/EC (latest amended by reg. 2018/831) as well as the relevant requirements laid down in Article 3, 11(5), 15 and 17 of regulation 1935/2004/EC (latest amended by reg. 596/2009/EC). Good manufacturing practice according to regulation 2023/2006 is applied.

Based on the information given by our suppliers:

- a) We confirm the compliance of the components in the articles (PS 485; PS 6540; PS 495 +PB 8100; MB ST0010) with the plastic regulation 10/2011 (incl. amendments).  
According to the above mentioned regulation the overall migration should not exceed 10 mg/dm<sup>2</sup> or 60 mg/kg
- b) Following monomers and additives that can be contained in the components are subject to restrictions (e.g. SML) under the plastic regulation 10/2011/EC and its amendments:

Monomer/additive	Ref.no./FCM (according to reg.10/2011/EC)	SML
1,3-Butadiene	13630 / 223	QM= 1mg/kg in finished article or SML=not detectable with DL<0,02 mg/kg
Octadecyl-3-(3,5-di-tert-butyl-4-hydroxyphenyl)propionate	68230/ 433	SML= 6mg/kg
2,4-Bis(octylthiomethyl)-6-methylphenol	40020 / 756	SML=5 mg/kg (as sum of ref.no. 40020+38940)
2-Ethyl-1-hexanol	17050/ 209	SML=30 mg/kg
Stearic acid, Zn-salt	24550 (89040)/106	SML 5mg/kg expressed as Zn

- c) Substances that underlie restrictions according to annex II of reg. 10/2011 (as amended): zinc, aluminium.

Hermsen | Siemensstraße 27 | 47533 Kleve

- d) The plastics the articles are made from do not contain dual use additives according to reg. 10/2011/EC which are mentioned in the respective EU regulations 1333/2008/EC or 1334/2008/EC:

Additive (E)	Ref.no.(FCM according to reg. 10/2011/EC
TiO2 (E171)	93440 / 610
SiO2 (E551)	86240 / 504
Al (E173)	
CaCO3 (E170)	42500 / 21

## **2. Migration and organoleptic testings**

Migration tests on the article material performed by an independent institute showed that overall migration (see 1.) and specific migration\* (see b.: SML) fall considerable below the respective SML given by regulation 10/2011 including amendments. Sensorical testings showed no significant deteriorations.

Ratio of food contact area to volume of the food simulant: 0,7cm<sup>2</sup>/cm<sup>3</sup> up to 1,4 cm<sup>2</sup>/cm<sup>3</sup>.

### **2.1 NIAS**

NIAS (not intentionally added substances) are unavoidable in plastic materials and articles, since they are the result of the manufacturing process or rare part of the polymer itself (oligomers) and can't be removed.

Based on our safety assessment including the information provided by our raw material suppliers as well as assessing migration of NIAS by performing NIAS screenings we can confirm that the articles if used under the conditions specified under pt. 3 comply with the requirements of article 3 of regulation 1935/2004/EC.

### **3. Intended food contact**

The above mentioned articles are intended to be used for the consumption of foodstuff.

Aqueous, acidic, alcoholic and fatty foodstuff is allowable under following conditions:

cold or hot filling up to 83°C which might be followed by room temperature storage up to 24 hours.

The articles are not suitable for deep-freezing.

Due to possible material softening the maximum filling temperature should not exceed 83°C.

Hermsen | Siemensstraße 27 | 47533 Kleve

**4. Functional Barrier**

The above mentioned articles do not contain a functional barrier.

The above mentioned articles do not contain varnishes or coatings in the meaning of reg. 2018/213/EU.

**5. Packaging and packaging waste/ Heavy metals**

Based on the information given by our suppliers we confirm that the plastic material the above mentioned articles are made from comply with dir. 94/62/EC as amended as concerns the defined limits of heavy metals.

**6. General**

This declaration is valid from the stated version date until this document is superseded. It will be renewed in case of regulatory and/or legal changes as well as possible changes in our products. We therefore recommend our customers to verify the regulatory status periodically by accessing ou Quality department.“

Stand: 30.04.2019

Mit freundlichen Grüßen
